

BEAUTY ENSURED, WALL PAINT SECURED.

Protective base for your wall paint

There's more to beautiful looking walls than just paint. That's because even the most expensive paint is prone to flaking. Unless of course, you protect it with Birla White Wallcare Putty. Being water resistant, it binds perfectly with the surface even if it is damp. And unlike ordinary putty, it forms a smooth, strong foundation that protects your paint from flaking. So that your beautifully painted walls, stay beautiful for years to come.

10 steps
for best results
with Wallcare Putty

- Clean the substrate using putty blade/wire brush.

- Add 30-35 % clean water to WallCare Putty.

- Make a uniform paste using mechanical stirrer.

- Surface should be prewetted before application.

- Apply 1st coat from bottom to upward direction.

- Allow the surface to dry for at least 3 hours.

- Rub the surface with wet sponge or putty blade.

- Apply second coat and let it dry for overnight.

- Gently rub the surface with emery paper.

- The surface is ready for painting.
